Our Promise

AUSTRALIAN OWNED

As an Australian-owned business since 2009, we take pride in delivering beautiful, functional solutions for bathrooms, kitchens and laundries nationwide.

QUALITY ASSURED

Our commitment to excellence guarantees our products are manufactured to the highest quality standards, and are tailored to suit Australian households.

CUSTOMER SUPPORT

Our national customer support team consists of knowledgeable and experienced team members ready to assist you wherever you are in Australia.

Curated Collection
**BASINS
& BATHS**

Our Curated Collection showcases our most popular styles of basins and baths to help you find the perfect fit for your bathroom. To explore our full collection, please visit fienza.com.au

BASINS & BATHS

Bath Styles

FREESTANDING

Freestanding baths are a luxurious centrepiece in any bathroom. They can be placed centrally in the space for a dramatic look, or closer to the wall for a more integrated design. These baths are designed with spacious interiors and come in various shapes, sizes and materials. Freestanding baths typically require floor mounted mixers, but also pair well with wall mixers when positioned closer to the wall.

BACK-TO-WALL

If you're aiming for functionality and maximising floor space, back-to-wall baths are a great choice. These baths sit flush against the wall, eliminating crevices and hard-to-reach places where dirt and grime can accumulate. The easy-clean design and built-in ledge makes these styles perfect for busy households. To complete the look, pair your back-to-wall bath with a stylish wall mixer set.

CORNER

Corner baths are designed to optimise floor space while adding a touch of elegance to the bathroom. A key feature of corner baths is they are designed with ergonomics in mind, offering contoured interiors and built-in shelves for extra space. Corner baths are a popular choice for small spaces, often combined with a shower for a cost-effective and space-saving solution.

Bath Materials

BASINS & BATHS

CONCRETE

Expanding our bath collection with natural materials like concrete offers a variety of colours and textures, with a bold and distinctive style in each piece. The durability of concrete protects against issues such as chipping, cracking and staining caused by heavy usage. It is also a reliable material for retaining heat, which is perfect during warm and relaxing baths.

SOLID SURFACE

Solid surface has similar properties to concrete, allowing for greater flexibility in design. Crafted from a blend of natural materials and acrylic, solid surface results in a highly durable, silky-smooth finish. The non-porous quality means it is highly resistant to bacteria, scratches and chips. Like concrete, it also has excellent thermal properties and can retain heat longer than acrylic baths.

ACRYLIC

Acrylic baths are a popular choice for their light weight and durability. These baths are UV stabilised to prevent yellowing, maintaining vibrancy for years to come. With its smooth, non-porous surface, any blemishes can be easily buffed out or mended with acrylic repair kits. Available in a wide range of shapes, sizes and styles, acrylic baths are an ideal choice for busy households.

Basin Styles

ABOVE COUNTER

Above counter basins are the centrepiece of the vanity and pair well with tall or wall-mounted mixers. These basins come in a wide range of colours, shapes and finishes, offering various customisation options. Their ergonomic design provides extra height, reducing the need for extra lean over the bowl. Installation for this type of basin is simple, requiring only a waste hole cut out of the benchtop.

SEMI INSET

Semi inset basins are only partially recessed into the benchtop, allowing you to make the most of your space. These basins can include built-in tap landings, or have the tap mounted directly into the benchtop. The exposed rim helps to reduce spills onto the benchtop surface and provides easy access to tapware. The lower profile makes semi inset basins an ideal choice for families, as anyone can comfortably access the basin.

UNDERMOUNT

Undermount basins maximise bench space by being installed entirely below the benchtop. Since they require extra space from your under-counter storage, they are best paired with mirror cabinets to provide additional storage space. Undermount basins also require precise benchtop cutting to accommodate the basin's size and shape. Fienza offers professional cutting and polishing when purchased with a vanity from our range.

Basin Styles

SEMI RECESSED

Semi recessed basins are a practical solution for any space. Unlike semi inset basins, semi recessed basins are partially recessed and extend over the edge of the bench, sacrificing less vanity space beneath. Semi recessed basins can also include tap landings, or have the tap mounted directly into the benchtop. With their low profile edge, these are an excellent choice for access and mobility purposes.

WALL HUNG

With its simple, understated design, wall hung basins are perfect for powder rooms and areas where additional storage isn't required. These basins allow easy access to your space and can be mounted to suit comfort and accessibility preferences. These basins pair well with standing or wall-mounted mixers and can be fitted with a coloured bottle trap to match your tapware.

FREESTANDING

Freestanding basins serve as a striking centrepiece in any bathroom. Their compact design makes them ideal for both small and large spaces, while their standalone structure allows for easy cleaning and maintenance. These basins are installed directly onto the floor and are typically paired with wall mixers or floor outlets to enhance their functionality and visual appeal.

Basin Materials

CERAMIC

Ceramic is a popular choice for its elegant surface and durability, and can include gloss or matte finishes. Our ceramic basins are crafted from vitreous china and coated with a protective enamel glaze to achieve a robust and sleek exterior. Being a non-porous finish, ceramic basins are highly resistant to discolouration, scratches, and moisture.

SOLID SURFACE

Solid surface is a stone-like material that can be moulded into various styles and colours. Unlike concrete's textured surface, solid surface basins have a smooth, stone-like finish. This prevents yellowing or cracking over time, maintaining its smooth and solid appearance. White solid surface basins are also easily repairable with light sanding and repair fluid.

CONCRETE

Expanding our basin collection with natural materials like concrete offers a variety of colours and textures to complement different bathroom styles. Concrete's natural porosity means it can be pigmented or dyed to achieve vibrant colours while maintaining its natural charm. Our concrete material is then coated with a nano-glaze layer to resist chips, cracks, and stains, making it perfect for daily use.

Warranties

Enjoy peace of mind with extended warranties on basins and baths.
