High Quality *Finishes*

Fienza mixers, tapware, bath outlets, showers and accessories are available in various styles and finishes. Our range of colours are applied using advanced technology to ensure a finish that is both beautiful and long-lasting.

CHROME

Polished chrome endures as the number one finish for its proven durability and versatility to compliment a wide range of bathroom styles.

MATTE WHITE

The ideal companion to neutral or soft colour palettes, our electroplated matte white finish is elegantly smooth, fresh and durable.

MATTE BLACK

A premium electroplated coating gives our matte black range consistent colour and a durable finish. It is a popular choice for adding contrast.

BRUSHED NICKEL

PVD brushed nickel has a similar look to unpolished stainless steel with a warm grey finish that can add softness to your colour palette.

GUN METAL

The dark, brushed tone of our PVD gun metal finish is ideal for those seeking an industrial, evocative feel for their bathroom.

NEW

BRUSHED COPPER

With its radiant sheen and earthy rich tone, our PVD brushed copper finish captures the essence of raw copper and refines it for contemporary styling.

URBAN BRASS

With a lightly brushed finish, PVD urban brass evokes the quality of brass while giving your bathroom a modern stylish accent colour.

WATERMARK CERTIFIED

Fienza products are manufactured to comply with Australian regulations and plumbing codes and are WaterMark certified.

WATER EFFICIENCY

The WELS rating is designed to help you make informed choices about the water efficiency of products. The majority of our mixers are WELS 5-Star or 6-Star rated, helping you to conserve water in your home or commercial building.

All showers achieve a minimum 3-Star rating, with selected Deluxe Showers holding a 4-Star rating. Some products, such as wall mixers, are not required to have a WELS rating as they are not sold with the spout that controls water flow.

DURABLE MATERIALS

Eco-Friendly Lead-Free Brass

Most products in our Tono® range are made from eco-friendly lead-free brass*. Lead-free brass is more resistant to corrosion than standard brass, preventing any additional heavy metals entering the water supply and preserving water quality.

*Defined as containing less than 0.25% lead.

Solid Brass Construction

Most of our mixers and tapware are made from solid brass to resist corrosion and bacteria, and are also designed to withstand high water temperatures.

PEX Split-Resistant Hoses

Fienza mixers include split-resistant PEX hoses. Cross-linked polyethylene (PEX) hoses ensure silent water flow as they expand under pressure, resisting splits or cracks and ensuring durability.

INDUSTRY LEADING WARRANTIES*

We are committed to producing high quality durable products that will stand the test of time. We are proud to offer industry leading warranties on our products to give you piece of mind.
