DECORATIVE LIGHTING

CATALOGUE

Welcome to the 2026 Decorative Lighting Catalogue

Mercator is proud to release the 2026 Decorative Lighting Catalogue, filled with new and exciting products that showcase the latest designs and technology around the world.

At Mercator, we are committed to providing customers with high quality, innovative products across the decorative and trade markets. Our team continues to create, inspire and innovate through focusing on developing an extensive range of products that serve the needs of consumers and electricians alike, with new trends and inspired styles as well as the latest electrician-friendly innovations. Our determination to exceed the needs of our customers ensures that we set the benchmark in design, innovation and quality.

Mercator constantly strives to deliver superior service to our customers by offering products of the highest quality alongside merchandising solutions and exceptional customer service support.

Our friendly and knowledgeable customer service team is committed to providing customers with technical advice and support across our ever expanding product offering.

The team at Mercator hope this catalogue will be a source of inspiration, and we thank you for your trust and support as our loyal customer. We are excited to provide you with the support you need to grow your business and achieve success.

General Information

All hard wired electrical products must be installed by a qualified electrician.

Measurements

All measurements within this manual are in millimeters and are designed to be used as a guide only. Measurements may vary slightly to those within this manual and may be modified for design or enhancement purposes. Mercator reserves the right to cancel or change all products without any prior notice. EXT indicates the extension from the wall or ceiling to the outer edge of the product.

Images

Minor design changes or alterations may result in slight variations between the product shown in this catalogue and the final product.

Decorative Lighting

Blend style and functionality, with visually striking fixtures that enhance commercial or residential interiors while providing quality illumination.

Style

Available in a wide range of styles—from sleek modern minimalism to ornate vintage charm and industrial edge—these fixtures are selected as much for their visual impact as for their light output.

Quality

Premium materials not only enhance the fixture's visual appeal but also contribute to its durability. The finishes are chosen to match or contrast with other design elements in a space.

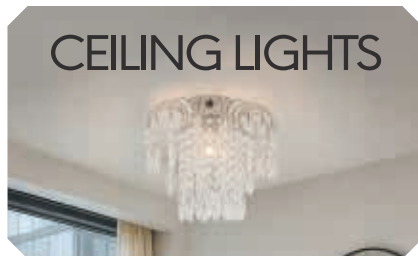

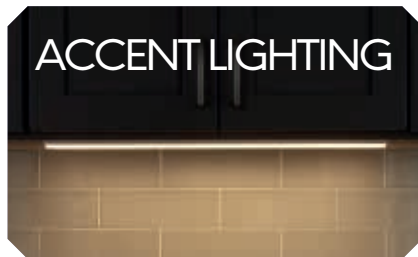

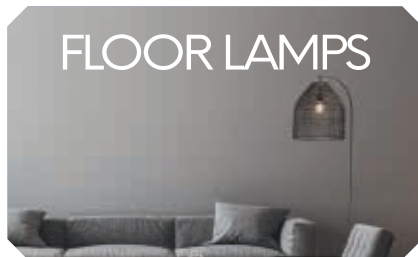

Installation

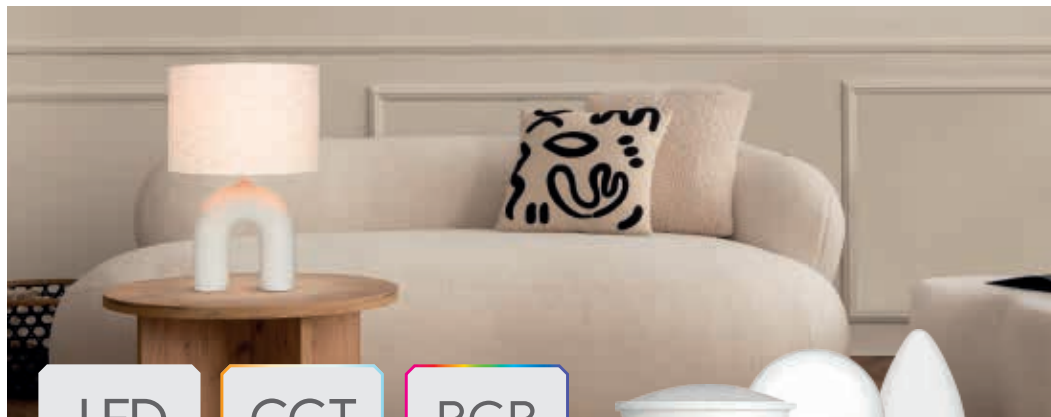

Suitable for almost any area of the home or commercial space. The wide range of different models are also designed to accommodate different spaces, giving installers flexibility.

Compatibility

Compatible with LED or smart bulbs, allowing users to control brightness, color temperature, or even set schedules through apps or voice assistants, helping create layered lighting environments that can shift from task lighting to relaxed mood lighting as needed.

LED

IK RATINGS

Reference

IK Rating classifies the level of protection electrical appliances provide against mechanical impacts from outside. It is defined by the standard IEC 62262. The degree of mechanical protection is identified by a code as follows;

Code	Impact energy (Joules)	Test
00	Non-protected	
01	0.15	Resistant against an impact from an object of 200 grams thrown from a distance of 7.5cm
02	0.2	Resistant against an impact from an object of 200 grams thrown from a distance of 10cm
03	0.35	Resistant against an impact from an object of 200 grams thrown from a distance of 17.5cm
04	0.5	Resistant against an impact from an object of 200 grams thrown from a distance of 25cm
05	0.7	Resistant against an impact from an object of 200 grams thrown from a distance of 35cm
06	1.0	Resistant against an impact from an object of 500 grams thrown from a distance of 20cm
07	2.0	Resistant against an impact from an object of 500 grams thrown from a distance of 40cm
08	5.0	Resistant against an impact from an object of 1.7kg thrown from a distance of 29.5cm
09	10.0	Resistant against an impact from an object of 5kg thrown from a distance of 20cm
10	20.0	Resistant against an impact from an object of 5kg thrown from a distance of 40cm

NZ Only Rating	Description	Symbol	AUS Equivalent	AUS '16 Update	IEC/EN Equivalent
IC-F	Type IC-F recessed luminaire where fixed, building insulating material that can be safely exposed continuously to temperatures up to 90° Celsius may abut and cover the luminaire. The symbol shall be permanently marked on the back of the fitting, be clearly visible, at least 20mm high and clearly legible. Resistant to ingress of external matter.		No Symbol Required - installation refers to AS/NZS 3000		No Symbol Required - installation refers to local wiring rules
IC	Type IC recessed luminaire where fixed, building insulating material that can be safely exposed continuously to temperatures up to 90° Celsius may abut and cover the luminaire. The symbol shall be permanently marked on the back of the fitting, be clearly visible, at least 20mm high and clearly legible.		No Symbol Required - installation refers to AS/NZS 3000		No Symbol Required - installation refers to local wiring rules
CA80	Type CA80 (90), closed abutted, recessed luminaire where fixed, building insulating material that can be safely exposed continuously to temperatures up to 90° Celsius must not cover but may closely abut the sides of the luminaire. The symbol shall be permanently marked on the back of the fitting, be clearly visible, at least 20mm high and clearly legible.				
CA135	Type CA 135, closed abutted, recessed luminaire where fixed, building insulating material that can be safely exposed continuously to temperatures up to 150° Celsius must not cover but may closely abut the sides of the luminaire. The symbol shall be permanently marked on the back off the fitting, be clearly visible, at least 20mm high and clearly legible.				
NON-IC	Not allowed to have any insulation within 100mm and cannot be installed in residential buildings. 20mm high and clearly legible. Resistant to ingress of external matter.				

The IP Code (or Ingress Protection Rating, sometimes also interpreted as International Protection Rating) consists of the letters IP followed by two digits.

First Numeral

IP	Requirements	Example	Protection of persons against access to hazardous parts with:
0	No protection		Non-protected
1	Full penetration of 50mm diameter sphere not allowed. Contact with hazardous parts not permitted.		Back of hand
2	Full penetration of 12.5mm diameter sphere not allowed. The jointed test finger shall have adequate clearance from hazardous parts.		Finger
3	The access probe of 2.5mm diameter shall not penetrate.		Tool
4	The access probe of 1.0mm diameter shall not penetrate.		Wire
5	Limited ingress of dust permitted (no harmful deposit).		Wire
6	Totally protected against the ingress of dust.		Wire

This Chart is intended to be read in conjunction with AS60529. Degrees of protection provided by enclosures for electrical equipment (IP Code). The symbols shown on this chart are for explanatory purposes only. They are not part of the IP Code and must be used instead of the Code.

IP65

First Numeral

Protection against the ingress of solid particles

Second Numeral

Protection against the harmful ingress of water

Second Numeral

IP	Requirements	Example	Protection from Water
0	No protection		Non-protected
1	Protected against falling drops of water. Limited ingress permitted.		Vertically dripping
2	Protected against vertically falling drops of water with the enclosure tilted 15° from the vertical. Limited ingress permitted.		Dripping up to 15° from the vertical
3	Protected against sprays to 60° from the vertical. Limited ingress permitted.		Tool
4	Protected against water splashed from all directions. Limited ingress permitted.		Wire
5	Protected against jets of water. Limited ingress permitted.		Wire
6	Protected against strong jets of water. Limited ingress permitted.		Wire
7	Protected against the effects of immersion between 15cm and 1m.		Temporary immersion
8	Protected against long periods of immersion under pressure.		Continuous immersion

DIY vs ELECTRICAL

In Australia, DIY installation is legal for certain low-voltage products if they:

- Are pre-wired with a 3-pin plug
- Operate at 240V AC
- Plug into a standard socket outlet
- Do not require hardwiring or structural electrical changes

Products that do not fit this criteria will need to be installed by a licensed electrician as indicated by this callout

This product must be installed by licensed electrician.

DIY

with FLEX
& PLUG

FLEX & PLUG

Flex & plug products are designed so you can install them yourself using a pre-fitted power cord with a 3-pin plug that allows the product to be plugged directly into a standard household socket outlet.

- Do not alter the plug, cord, or wiring yourself.
- Only install where there is an existing socket outlet (GPO).
- Always turn off power before mounting or handling the product.
- Follow the product's mounting and safety instructions.
- If no power outlet is available, call a licensed electrician.

B22 BATTEN FIX

B22 batten fix lights are designed so you can easily upgrade your room's lighting without hardwiring or hiring an electrician. A batten fix light attaches directly to an existing B22 bayonet lamp holder that's already wired into your ceiling.

- Unscrew your old shade or fitting.
- Attach the new batten fix light fitting.
- Insert globe as directed.
- Only use with a secure, existing B22 batten holder in good condition.
- Always switch off power at the wall before installation.
- Ensure the fitting is suitable for the globe type and wattage recommended.
- Do not attempt to rewire or replace the batten holder yourself — call a licensed electrician if it's damaged or loose.

Globe Recommendation and Selection Guide

With a large variety of globes on the market, it can be difficult to find what you really need. To make this easier, we have included a table of recommended globes and wattages for each product to help simplify your selection.

Energy saving lamps, such as CFL, LED or energy saving halogen are sold in wattages much like regular incandescent globes, but they will use less power whilst producing the same or greater light output.

The Mercator manual details the globe type, base and maximum wattage recommended.

Remember: DO NOT exceed the recommended wattage for each product outlined in this manual, as our warranty may not apply if overheating occurs. The maximum wattage specified is as per Australian Electrical Safety Standard.

The use of globes other than those specifically listed for each product is not recommended.

Bulb Base

There are also a number of Base Types available. The following is a summary of the most commonly used base types in this manual.

Type: **E27**
Desc: Edison Screw
Type: Incandescent/Compact Fluorescent Lamp/LED

Type: **B22**
Desc: Bayonet Cap
Type: Incandescent/Compact Fluorescent Lamp/LED

Type: **E14**
Desc: Small Edison Screw
Type: Incandescent/Compact Fluorescent Lamp/LED

Type: **B15**
Desc: Small Bayonet Cap
Type: Incandescent/Compact Fluorescent Lamp/LED

Type: **GU10**
Desc: Twisted Dichroic
Type: Halogen/LED

Type: **R7s**
Desc: Double Ended
Type: Halogen

Type: **T5 Fluorescent**
Desc: Circular
Type: Fluorescent

Globe Type

Summary of the globe types and equivalent wattages:

LED

CFL

Halogen

Incandescent

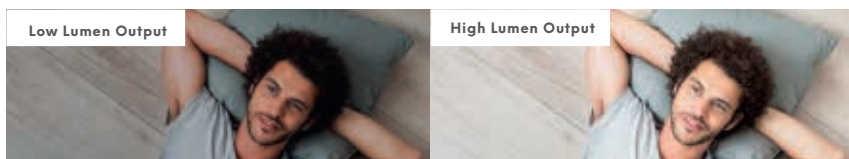

4W	6W	18W	25W
6W	9W	28W	40W
10W	12W	42W	60W
13W	15W	53W	75W
18W	20W	70W	100W

Lumens v Watts

Lumens is the measurement of the total light output emitted by a fixture or globe. The higher the lumen rating, the brighter the light. The lower the lumen rating, the duller the light.

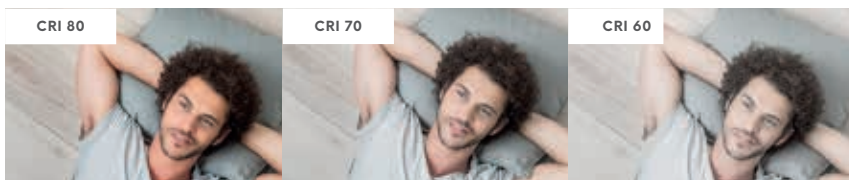

Watts is the measurement of the amount of power consumed by the light fitting in order to function. When it comes to traditional incandescent globes the general rule is that the higher the wattage, the brighter the light. However, the use of LED or energy efficient globes allows you to use light fixtures that reduce your power consumption without a reduction in light output.

As globes & light fittings are produced in varying levels of watts/lumen ratios, it is best when buying a product to not only ensure it is within the wattage recommended by the supplier, but also pay close attention to the lumen performance to ensure you are using a globe that performs appropriately.

Colour Rendering Index (CRI)

Colour Rendering Index (CRI) is the rating given to a light source's ability to reveal the true colour of an object to the human eye in comparison to a natural light source. The CRI of a product is reflected as a rating between 0 – 100. The higher the rating, the better the colour rendering ability of the globe. Light sources that rate between 85 and 90 are considered to have good colour rendering ability. Globes above 90 CRI have excellent colour rendering ability.

Colour Temperature

Colour Temperature is the means of determining the light appearance provided by a light globe or fixture. It is usually measured in degrees Kelvin (K). Typical colour temperatures used within the Australian market are;

- Warm white (WW) – 2000K to 3000K
- Neutral white (NW) – 3100K to under 4500K
- Cool white (CW) – 4600K to 5900K
- Daylight (DL) – 6000K plus

Globes with warmer colour temperatures are usually suitable for living rooms, kitchens and bedrooms. Globes with neutral, cool or daylight colour temperatures are suitable for garages, basements, studies and bathrooms.

1. LIMITED REPAIR / REPLACEMENT WARRANTY

MERCATOR offers a repair or replacement warranty on MERCATOR products in cases where the product fails due to defective materials or workmanship. Please refer to the **LIMITED WARRANTY PERIOD TABLE** which sets out the relevant warranty and warranty period which MERCATOR grants to the purchaser of the MERCATOR product. The warranty period begins from the date of purchase. Also, please refer to **WHAT IS NOT COVERED BY THE LIMITED REPAIR / REPLACEMENT WARRANTY**.

You must have proof of purchase (such as the original dated purchase receipt) from an **authorised MERCATOR retailer** to make a warranty claim. In addition, a certificate of compliance for the installation as required by law from the installing electrician is required for products requiring installation by licensed electricians. Please refer to the Instruction leaflet for the MERCATOR product purchased, which will state if the product is required to be installed by a licensed electrician. Warranty claims without this documentation will NOT be accepted.

REPAIRS / REPLACEMENTS

MERCATOR Products presented for repair may be replaced by refurbished goods of the same type rather than being repaired. Refurbished parts may be used to repair the goods.

BALANCE OF WARRANTY

To the maximum extent permitted by law, any replaced or repaired products by MERCATOR are covered only by the balance of the warranty period remaining from the date of purchase of the original MERCATOR product.

2. IN-HOME REPAIR / REPLACEMENT WARRANTY

In addition to the limited warranty terms set out under section (1) above, the in-home warranty applies to all lighting products which are hard wired to the electricity supply at residential premises and are required to be installed by a licensed electrician.

Where a consumer asserts that a product installed in-home is faulty, and a MERCATOR service agent has attended at the property, A SERVICE CALL FEE WILL BE CHARGED TO THE CONSUMER IF:

The product is deemed to be a non-MERCATOR product;

1. There is nothing wrong with the MERCATOR product or to the extent that the failure is not a failure of the product to perform in accordance with its published features and specifications as reasonably determined by MERCATOR;
2. The original installation of the MERCATOR product was not carried out by a licensed electrician;
3. The installation is not performed in accordance with the relevant MERCATOR product installation instructions;
4. The defects have been caused by incorrect application or abuse or misuse by the consumer of the MERCATOR product.

MERCATOR – LIMITED WARRANTY – LIGHTING PRODUCTS TERMS AND CONDITIONS

In cases of in-home repair/replacements in areas outside the coverage of MERCATOR service agents, MERCATOR will reimburse customers a standard fee of \$95.00 (inc. GST) for using their own electrician. Any service request must be arranged with the MERCATOR warranty department and obtained an Approval Reference Number (ARN) before calling your own electrician. Reimbursements will not be made for call-out fees or other costs without prior approval in writing of the MERCATOR warranty department.

In the circumstances where an emergency has arisen out of normal business hours and the MERCATOR warranty department cannot be contacted to dispatch a service agent to the premises, MERCATOR will reimburse customers their reasonable costs (as determined by MERCATOR) for using their own electrician.

3. WARRANTY TRANSFER

If the ownership changes on the dwelling where the MERCATOR product is installed, the balance of the warranty period passes to the new owner provided the proof of purchase (such as the original dated purchase receipt) from an authorised MERCATOR retailer is retained by the new owner. In addition, a certificate of compliance for the installation as required by law from the installing electrician is required for products requiring installation by licensed electricians.

4. AUSTRALIAN CONSUMER LAW

The benefits given to you in this warranty document are in addition to your other rights and remedies under a law in relation to the products to which this warranty document relates.

"YOUR CONSUMER RIGHTS"

"Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund

for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure."

Subject to "Your Consumer Rights" outlined above, but otherwise to the maximum extent permitted by law, MERCATOR will not be liable for any consequential or indirect loss or damage suffered or incurred by you in relation to a MERCATOR product, including but not limited to loss of use, loss or damage for business interruption, or profits.

5. WHAT IS NOT COVERED BY THE LIMITED REPAIR / REPLACEMENT WARRANTY OR THE IN-HOME REPAIR/REPLACEMENT WARRANTY

Subject to "Your Consumer Rights", but otherwise to the maximum extent permitted by law, the MERCATOR warranties provided in this document will not cover the following:

1. MERCATOR products that are not purchased from an authorised retailer and installed in Australia.
2. Where installation was not carried out by a licensed electrician as required.
3. MERCATOR products not installed in accordance with the product's installation instructions or specifications.
4. MERCATOR products not used in accordance with the instructions for use or specifications.
5. Defect, damage or failure to a MERCATOR product resulting from misuse, accident, neglect, abuse, tampering, modifications or unauthorised repairs of any kind by any person.
6. Damages not caused by a fault in the MERCATOR product materials or workmanship.

MERCATOR – LIMITED WARRANTY – LIGHTING PRODUCTS TERMS AND CONDITIONS

7. Defect, damage or failure to a MERCATOR product resulting from any acts of God, including damages from lightning, power grid fluctuations, or power surges.
8. Replacement of light sources (globes, fluorescent tubes, etc) unless specified.
9. Replacement of batteries supplied with certain products.
10. Power supply "noise", intermittent "humming" or other influences from mains power delivery infrastructure. Signals sent through the power grid by the electricity provider for the control of off peak hot water, street lights and other devices may cause an intermittent humming noise in your MERCATOR product. Filters for blocking/reducing such signals are available in Australia at the customer's expense. These noises do not indicate the MERCATOR product is faulty.
11. Damage caused by alternative power systems (for example: solar inverters, etc.).
12. Water damage of any kind caused by inappropriate placement of fittings not IP rated for that location.
13. The cost of renting, obtaining and using special access equipment (i.e. scaffoldings, scissor lifts, etc.) for accessing products installed at a height of greater than 3.0 meters.
14. Travelling costs incurred by MERCATOR personnel or service agents traveling greater than 25 Km from a MERCATOR authorised service agent. The purchaser must meet these traveling costs.

15. Non-structural corrosion damage of non-316 stainless steel components such as surface rust or minor rust.

6. COMMERCIAL USE

Mercator products which specifically designed for commercial use are designated as Commercial Use Products on the product packaging.

All other Mercator products are designed for domestic use.

Where products designed for domestic use are used in a commercial environment/commercial premises one third of the domestic warranty.

THIS WARRANTY IS VALID IN AUSTRALIA ONLY

HOW TO MAKE A WARRANTY CLAIM

A. Limited repair/replacement warranty:

Please return the faulty MERCATOR product together with a copy of the proof of purchase, and if required, a certificate of compliance for the installation of the product by the licensed electrician who installed the product, to the authorised MERCATOR retailer where the product was purchased. To the maximum extent permitted by law, the customer must bear the costs and expenses of claiming under this warranty, including but not limited to the cost incurred in freight, postage, handling, travel, dismantling or reinstalling the product.

B. In-home repair/replacement warranty:

Where an in-home warranty applies, please phone the MERCATOR customer care hotline 1300 55 22 55 (select option 2.) Australia for all in-home warranty enquiries and do not phone or return the product to the retailer. Do not uninstall or return a hard-wired product to the retailer unless advised to do so by a MERCATOR customer service representative.
